

P2292.D1

09/587,049

Amendment D

**REMARKS**

Reconsideration of the subject application is respectfully requested.

Applicants, by their undersigned attorney thank the Examiner for the courtesies extended in their recent telephone interview. Applicants also acknowledge with appreciation the allowance of Claims 8-12, 15, 18, 20, 39, 40 and 43.

Claim 13 and 16, and their dependent claims were rejected under 35 U.S.C. 112 on the basis of lack of support in the specification for particular language recited in the claims. In response to the examiner's indication, applicants have amended claims 13 and 16 to reflect the language used in the specification.

In amended claims 13 and 16, "a rhythm of at least one of a daily, monthly and annual cycle calculated by use of the indicator over a specified period of time in the past" has been replaced with "circulatory indicators measured by the measuring means over a specific number of days in the past". The applicant believes that the substituted language in the amended claims is supported by the following parts of the specification originally filed, and the amended claims 13 and 16 are now in patentable form.

Referring to the specification beginning at page 144, line 3, it states, in part:

"Microcomputer 745 references circulatory parameters obtained over a fixed interval of time in the past which are stored in memory 741, and uses this data to regulate fragrance emission by first fragrance emitting means 500 and second fragrance emitting means 600." (emphasis added)

Referring to the specification beginning at page 145, line 20, it states, in part:

"Namely, microcomputer 745 reads out past circulatory parameters obtained over a fixed time interval (a specific number of days) which have been stored in memory 741, and calculates the transition average for the times when a specific parameter (for example, resistance RP) reaches its maximum and when

P2292.D1

09/587,049

Amendment D

it reaches its minimum. Based on the results of these calculations, microcomputer 745 obtains the time periods during which the user moves from a sedate to an aroused state (periods TA and TC in FIG. 123), and the time periods during which the user moves from an aroused to a sedate state (periods TB and TD in FIG. 123). Next, microcomputer 745 sets fragrance emission commands so that the appropriate fragrance of the selected mode will be released at a specified time of the day (for example, at the middle of the time period) in the time period determined as above." (emphasis added)

Referring to the specification beginning at page 148, line 18, it states, in part:

"Namely, microcomputer 745 reads out from memory 741 the [LF/HF] values for a fixed number of past days (the past week, for example), and obtains an average [LF/HF] value in each time period. Next, microcomputer 745 calculates the time of day when the average value of [LF/HF] reaches its maximum and minimum values.

Next, based on these calculated results, microcomputer 745 obtains the time periods during which the user moves from a sedate to an aroused state, and from an aroused to a sedate state. Microcomputer 745 then sets fragrance emission commands so that the appropriate fragrance of the selected mode will be released at a specified time of day (for example, at the middle of the time period) in the time periods obtained.

Subsequently, once the designated time of day is reached, microcomputer 745 carries out fragrance emission by driving first fragrance emitting means 500 or second fragrance emitting means 600." (emphasis added)

Claims 14, 17, 19, 21-24, 41 and 42 were also rejected under 35 U.S.C. 112, as being dependent upon a rejected base claim, namely claims 13 and 16. In view of the amendments to claims 13 and 16, and the foregoing remarks, it is believed that these claims are now also in patentable form.

In view of the foregoing amendments and remarks, Applicants respectfully request favorable reconsideration of the present application.

P2292.D1

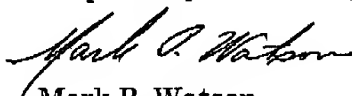

09/587,049

Amendment D

**NOTE**

Applicants filed a Second Supplemental IDS that was received by the Patent Office on May 6, 2002, and a Fifth Supplemental IDS that was received by the Patent Office on September 29, 2003, as indicated on the attached page from the PAIR system. It is respectfully requested that the forms PTO-1449 filed with each of these IDSs be initialed by the Examiner and returned to Applicants with the next office communication.

Respectfully submitted,

Mark P. Watson

Ann F. GeorgeSECOND SUPPLEMENTAL INFORMATION DISCLOSURE  
STATEMENTAssistant Commissioner for Patents  
Washington, D.C. 20231

Sir:

In compliance with the duty of disclosure under 37 C.F.R. § 1.56, and in accordance with the practice under 37 C.F.R. § 1.97 and § 1.98, the Examiner's attention is directed to the documents listed on the enclosed Form PTO-1449. Copies of the listed information are also enclosed.

This Information Disclosure Statement is being filed more than three months after the U.S. filing date and after the mailing date of the first Office Action on the merits, but before the mailing date of a Final Action under §1.113 or Notice of Allowance under §1.311 (37 CFR §1.97(c)).

The Commissioner is authorized to charge the fee of \$180.00 under 37 CFR §1.17(p) to Deposit Account No. 19-2746.

## CONCLUSION

The Commissioner is hereby authorized to charge any additional fees which may be required, or credit any over-payment to Deposit Account 19-2746.
